

The bottoms of the Maria La Gorda International Diving Centre provide the sharpest contrasts for underwater photography because of the transparency of its water, with visibility of up to 30 metres of longitudinal distance in depths of 25 and 30 metres.

This is the setting for the IMASUB 2019 underwater photography conference, where underwater photographers from all countries will participate openly, only being required to comply with the event regulations.

EVENT SCHEDULE:

Date: 28 May – 2 June 2018 (6 days /5 nights)
